DECLARATION FOR SUBPOENA DUCES TECUMCase No: **ADJ15724643**

State of California, County of: Los Angeles

The undersigned states: Matrix Document Imaging is the authorized Deposition Officer to obtain records by

Acosta Law Office

That he/she is (one of) the attorney (s) of record/representative (s) for the Applicant/Defendant in the action captioned on the reverse hereof.

That the subpoenaed custodian of record has in his/her possession or under his/her control the documents described on the reverse side hereof. That the said documents are material to the issues involved in the case and may contain information that is not available from any other known source.

Said records are relevant to the allegations and defenses by the parties in the prosecution of this matter, to provide an accurate medical history of the applicant, to prove an injury and notice thereof, to provide the right to compensation, permanent and temporary disability, medical treatment, and any possible penalties. Pursuant to Labor Code section 5401 form DWC 1 has been duly filed.

Declaration for Injuries on or After January 1, 1990 and Before January 1, 1994

That an Employee's Claim for Workers' Compensation Benefits (DWC Form 1) has been filed in accordance with Labor Code Section 5401 by the alleged injured workers whose records are sought, or if the worker is deceased, by the dependent(s) of the decedent, and that a true copy of the form filed is attached hereto. *(Check box if applicable and part of declaration below. See instructions on page one of the subpoena.)*

I declare under penalty of perjury that the foregoing is true and correct.

PRIMARY TREATING PHYSICIAN'S SUPPLEMENTAL REPORT

RE: Almanza, Maria
EMP: Volt Workforce Solution
D/I: October 14, 2021
D/E: June 1, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Maria Almanza comes in today for reexamination. Today's evaluation was conducted through a Spanish-speaking interpreter.

The patient brings in her MRI disc of her left wrist.

REVIEW OF DIAGNOSTIC STUDIES:

11/23/22 George Elias, M.D. MRI of left wrist. There is a ganglion cyst noted along the volar aspect of the wrist, mild trapezial metacarpal osteoarthritic changes. There is no acute fracture.

PHYSICAL EXAMINATION:

The patient has decreased sensation in the median nerve distribution of the left hand. Positive Phalen's test.

DISCUSSION:

At this time, I would recommend EMG/nerve conduction studies to rule out carpal tunnel syndrome.

WORK STATUS:

No forceful gripping and grasping.

FOLLOW-UP:

Four weeks.

Today's evaluation was conducted through a Spanish-speaking interpreter.

DISCLOSURE:

I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury.

I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others. As to that information, I declare under penalty of perjury that the information accurately describes the information provided to me, and except as noted herein, that I believe it to be true.

This report was signed in the County of San Diego, California.

Very truly yours,

Christopher T. Behr, M.D.

Email: SCHEDULING@CALDIAGNOSTIC.COM

Test Date: 8/7/2023

Patient:	Maria Almanza	DOB:	12/7/1972	Physician:	Bradley Chesler M.D./ Jeffrey T. Ho, D.O.
Sex:	Female	Ref Phys:	Dr. Behr		

Patient Complaints: Numbness and paresthesia bilateral hands.

History:

She has numbness in her hands. She was working as a machinist. She was making the probes for the COVID test. She had an accident lifting a 60 lbs box. The injury was 10-14- 2021.

EXAM:

General: Alert, oriented, no acute distress

Head: Normocephalic, EOMI

Skin: Intact, no rash

Chest: Chest wall symmetrical, no respiratory distress

Abdomen: Soft, nontender

Extremities: No cyanosis/clubbing/edema

Musculoskeletal:

C Spine- mild decreased ROM, mild TTP paraspinals

Neuro: Motor grossly 5/5

Sensation- intact to LT, except reduced in the median distribution bilaterally.

Working Diagnosis: Pain in Limb, Nerve Pain

ELECTRODIAGNOSTIC STUDY:

Nerve conduction study of the BILATERAL UPPER EXTREMITIES was done today with the surface skin temperature at 32 degrees Celsius and above near the site of the recording electrodes. Informed consent was obtained. Benefits, alternatives, and possible risks including, but not limited to, bleeding, bruising, infection, and pain were explained to the patient. Patient verbally consented to proceed with study. Site cleaned with alcohol. Needle electromyography was performed with a sterile monopolar disposable needle electrode on selected muscles as shown below. Nerve conduction studies were performed using standard surface conduction techniques. The patient tolerated the procedure without complications. Explained today's findings to the patient. Voiced understanding. Patient agreed to follow up with the referring physician. Patient tolerated the exam well.

Mr. Israel Leana was assistant today.

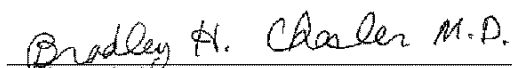

Mr. Israel Leana -assistant was present during the test

NCV & EMG Findings:

Evaluation of the Left dorsal cutaneous sensory nerve was within normal limits. The Left median motor nerve was within normal limits. The Right median motor nerve was within normal limits. The Left median sensory nerve was within normal limits. The Right median sensory nerve was within normal limits. The Left radial sensory nerve was within normal limits. The Right radial sensory nerve was within normal limits. The Left ulnar motor nerve was within normal limits. The Left ulnar sensory nerve was within normal limits. The Right ulnar sensory nerve was within normal limits.

Needle evaluation of the Left Cerv Paraspinals, the Right Cerv Paraspinals, the Left trapezius, the Left supraspinatus, the Left deltoid, the Left biceps, the Left ExtCarRad, the Left triceps, the Left flexor carpi radialis, the Left abductor pollicis brevis, the Left first dorsal interosseous, the Right trapezius, the Right supraspinatus, the Right deltoid, the Right biceps, the Right ExtCarRad, the Right triceps, the Right flexor carpi radialis, the Right abductor pollicis brevis, and the Right first dorsal interosseous muscles (as indicated in the following table) did not reveal any electromyographic abnormality today.

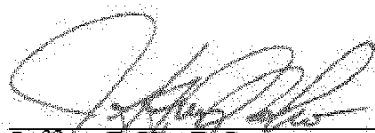

Impression: 1) Normal examination

Nerve Conduction Studies

Waveforms:

MAX MRI IMAGING, INC.

PATIENT NAME: **ALMANZA, MARIA**
REFERRING PHYSICIAN: **Dr. STRIZAK, ALAN**

DOB: **12/07/1972**
DATE OF EXAM: **11/23/2022**

EXAM TYPE: MRI OF THE LEFT WRIST

This study was performed on a Hitachi Arias II 0.3 Magnetic Resonance Imaging System.

Technique:

1. Axial T1.
2. Axial T2.
3. Sagittal T2.
4. Coronal T1.
5. Coronal STIR.

Clinical History:

Pain.

Findings:

There are mild trapeziometacarpal osteoarthritic changes.

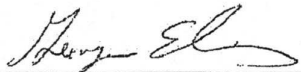

TFCC is intact. The carpal tunnel is unremarkable. There is a ganglion cyst noted along the volar radial aspect of the wrist measuring a dimension of 4 mm. This is located deep to the flexor carpi radialis tendon. This is located volar to the radiocarpal joint.

There is limited evaluation of the scapholunate and lunotriquetral ligaments on this exam. There is no acute fracture. Flexor and extensor tendons are intact.

Conclusion:

1. There is a ganglion cyst noted along the volar radial aspect of the wrist.
2. Mild trapeziometacarpal osteoarthritic changes.
3. There is no acute fracture.

Thank you for referring this patient.

HIPAA ACKNOWLEDGEMENT / CONSENT FORM

I understand that I have certain rights to privacy regarding my protected health information. These rights are given to me under the Health Portability and Accountability Act of 1996 (HIPAA). I understand that by signing this consent I authorize you to use and disclose my protected health information to carry out:

- Treatment (including direct or indirect treatment by other healthcare providers involved in my treatment);
- Obtaining payment from third party payers (e.g. my insurance company);
- The day-to-day healthcare operations of your practice.

I have also been informed of and given the right to review and secure a copy of your Notice of Privacy Practices, which contains a more complete description of the uses and disclosures of my protected health information and my rights under HIPAA. I understand that you reserve the right to change the terms of this notice from time to time and that I may contact you at any time to obtain the most current copy of this notice.

By supplying my home phone number, mobile phone number, email address, and any other personal contact information, I authorize the practice and my health care provider, or a business associate of theirs, to contact me at any of the numbers or email addresses using an automatic telephone dialing system, using a pre-recorded voice or other third-party automated outreach and messaging system as well as to use my protected health information, or other personal or identifying information, during such contact for any administrative or healthcare matter. (Examples include appointment reminders or satisfaction surveys.) I consent to the practice, my provider, or their business associates contacting me via unencrypted email and text messages.

Initial here to decline: _____

Releasing information to family members or friends: SDOA will not release information to family or friends without your consent. If you would like us to release information on your behalf, please list those individuals here:

Name: _____ Relationship: _____

Name: _____ Relationship: _____

I understand that I may revoke this consent, in writing, at any time. However, any use of disclosure that occurred prior to the date I revoke this consent is not affected.

Insurance Authorization and Assignment of Benefits

I certify that the information that I have reported with regards to my insurance coverage is correct. I also authorize the release of any medical information necessary to process this claim. I also authorize payment of medical benefits to San Diego Orthopaedic Associates, for anesthesia and orthopedic surgical services provided to me. I fully understand that payment for services is not contingent upon recovery and this does not relieve me of my primary obligation to pay.

1) Employer Pegazos Position House Keeping How Long? 3 years
2) Employer _____ Position _____ How Long? _____
3) Employer _____ Position _____ How Long? _____

Have you filed for a previous workers' compensation injury? ☒ Yes ☐ No

If yes, was there a settlement as the result of the injury? ☒ Yes ☐ No Please explain: Left Knee

HISTORY OF INJURY

Specific date of injury: 10/14/21

If there is no specific date of injury, when did you first begin to have problems? _____

Tell in your own words what happened: Lifting & Carrying a box.

Did you continue to work? ☒ Yes ☐ No

When did you report this injury? A week later To whom did you report this injury? Supervisor

Have you received any treatment for your injury? ☒ Yes ☐ No

If yes, when did you first receive treatment? 10/25/21

If yes, list medical providers seen:

1)	Dr. <u>Work Partners</u>	Date seen: _____
2)	Dr. <u>2</u>	Date seen: _____
3)	Dr. _____	Date seen: _____
4)	Dr. _____	Date seen: _____
5)	Dr. _____	Date seen: _____

If yes, what were you told was the problem? _____

If yes, what treatment have you had?

☐ Medication ☐ Injections ☐ Surgery
☒ Physical Therapy ☐ Cast, splint, boot
☐ Other (_____)

Did any treatment help? ☐ Yes ☒ No

If yes, what helped? _____

Have you returned to work? ☐ Yes ☒ No

If yes, when? _____

Are you still working for the same employer? ☐ Yes ☒ No

If no, are you working anywhere else? ☐ Yes ☒ No If yes, where? _____

If working, what are your current job duties? _____

ORTHOPAEDIC CONSULTATION

RE: Maria Almanza
EMP: VOLT WORKFORCE SOLUTION
D/I: LT WRST, LT ARM, LT SHLDR 10142021
D/E: April 06, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Today's visit is conducted via a Spanish speaking translator.

Thank you for the opportunity to participate in the care of the above-named claimant, Maria Almanza, who was examined on Apr 06, 2023 by the undersigned as the primary treating physician. The following is a narrative report, based upon the pre-examination interview, physical examination, review of available medical records, review of pertinent radiographic studies and treatment consultation.

JOB DESCRIPTION:

Maria Almanza is a 50 year female who is employed by VOLT WORKFORCE SOLUTION where she has worked as an Assembler/Packer for 2 years. Her job entails assembling and packing covid tests.

HISTORY OF INJURY AS STATED BY THE CLAIMANT:

Maria Almanza states that on October 14, 2021 she was working in her usual and customary fashion while lifting and carrying a heavy box when

she felt an acute onset of pain in the left hand causing her to drop the box. She reported this injury approximately 1 week later to her supervisor. She was evaluated and treatment has included 15 sessions of physical therapy, bracing, and medication including Ibuprofen. She reports minimal relief with this treatment. The patient presents today complaining of ongoing left shoulder and left wrist/hand pain. She states activity exacerbates her pain. She has been managing this with rest and ice. The patient rates her pain a 6 out of 10 at today's visit.

PRESENT COMPLAINTS AS STATED BY THE CLAIMANT:

1. Left hand/wrist pain.
2. Left shoulder pain.

PAST MEDICAL HISTORY:

Anemia, arthritis, and anxiety.

PAST SURGICAL HISTORY:

Right wrist surgery. C-section.

FAMILY HISTORY:

None.

MEDICATIONS:

Ibuprofen.

ALLERGIES:

NKDA.

SOCIAL HISTORY:

Never smoker. Does not consume alcohol.

REVIEW OF SYSTEMS:

Positive for anxiety.

ACTIVITIES OF DAILY LIVING:

Limitations with sleeping, driving, grasping, and lifting.

MEDICAL RECORD REVIEW:

35 minutes of time was spent reviewing the available records and these are listed and summarized in the section below.

11/23/22, George Elias, M.D. MRI left wrist.

Conclusion: 1. There is a ganglion cyst noted along the volar radial aspect of the wrist. 2. Mild trapeziometacarpal osteoarthritic changes. 3. There is no acute fracture.

PHYSICAL EXAMINATION:

The patient was an alert female in no acute distress. She was alert and cooperative throughout the examination.

The patient stands 5'4 and weighs 120 pounds.

Active elbow range of motion:	<u>Right</u>	<u>Left</u>
extension	0	0
flexion	140	140
pronation	90	90
supination	90	90

No deformity. No cyst seen. Mild tenderness to palpation.

Active wrist range of motion:	<u>Right</u>	<u>Left</u>
dorsiflexion	80	80
palmar flexion	80	80
radial deviation	20	20
ulnar deviation	40	40

Carpal tunnel tests:	<u>Right</u>	<u>Left</u>

FDP - small finger	-	-
1st dorsal interosseous wasting	-	-

de Quervain's tests:	<u>Right</u>	<u>Left</u>
Finkelstein's	-	-
first dorsal compartment TTP	-	-

Active shoulder range of motion:	<u>Right</u>	<u>Left</u>
abduction	180	180
forward elevation	180	180

Maria Almanza

Patient ID: 9350550 SRS ID: 663319 Date of Service: 4/6/2023

external rotation (arm at side)	70	70
external rotation (90° abduction)	90	90
internal rotation (90° abduction)	80	80
internal rotation (spinous process)	T7	T7
extension	50	50
adduction	50	50

Provocative tests:	<u>Right</u>	<u>Left</u>
Neer impingement	-	-
Hawkins impingement	-	-
Drop-arm	-	-
Gerber lift-off (subscapularis test)	-	-
Speed's test (bicipital tendinitis)	-	-
Yergason's test (bicipital tendinitis)	-	-
cross-body adduction (AC joint test)	-	-
O'Brien's maneuver (labral tear)	-	-

External rotation strength at side: 5/5 and symmetric.

Supraspinatus strength testing: 5/5 and symmetric.

RADIOGRAPHIC EVALUATION:

Plain radiographs, 3 views, of the left wrist reveals no acute abnormalities.

Plain radiographs, 3 views, of the left shoulder reveals no acute abnormalities.

DIAGNOSIS:

1. Industrial left wrist sprain.
2. Industrial left shoulder sprain.

DISCUSSION:

The patient presents today for an initial evaluation of her left upper extremity. Patient is experiencing ongoing left upper extremity pain. Roentgenogram of the left wrist and left shoulder were performed in the office today and reviewed by me. The patient has completed an MRI scan however, she does not bring this in for review. Patient was advised to obtain her MRI disk so that we may review this imaging. She understood. She is released to modified work duty at this time. The patient was in agreement with this plan and all of her questions were answered. The patient will follow up in 4 weeks.

DISABILITY STATUS:

The patient is not permanent and stationary.

Maria Almanza

Patient ID: 9350550 SRS ID: 663319 Date of Service: 4/6/2023

WORK RESTRICTIONS:

No forceful gripping/grasping.

CAUSATION:

It is my medical opinion, based within reasonable medical probability, that Maria Almanza symptoms are causally related to the industrial injury of October 14, 2021.

APPORTIONMENT:

100% of the patient's disability is a result of her industrial injury.

VOCATIONAL REHABILITATION:

Not indicated.

TREATMENT RECOMMENDATIONS:

Applicant needs to retrieve MRI images of the left wrist.

Please note that 60-74 minutes of total time were spent on this E/M service on this encounter date. This non-face-to-face as well as face-to-face total time included some or all of the following: preparing to see the patient; obtaining and/or reviewing separately obtained history; performing a medically necessary and appropriate examination and/or evaluation; counseling and educating the patient, family, and/or caregiver; ordering medications, tests, or procedures; scheduling surgery; referring to and communicating with other healthcare professionals; independently interpreting results and communicating results to the patient, family, and/or caregiver; care coordination; discussing the case with the nurse case manager; documenting clinical information in the EHR.

DISCLOSURE:

I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury.

I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others. As to that information, I declare under penalty of perjury that the information accurately describes the information provided to me, and except as noted herein, that I believe it to be true.

This report was signed in the County of San Diego, California.

PRIMARY TREATING PHYSICIAN'S FOLLOW UP REPORT

RE: Maria Almanza
EMP: VOLT WORKFORCE SOLUTION
D/I: LT WRST, LT ARM, LT SHLDR 10142021
D/E: May 04, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Today's visit is conducted via a Spanish speaking translator.

Ms. Almanza presents today for reevaluation of her left upper extremity. Patient is experiencing ongoing left upper extremity pain. She was last seen on 4/6/23. She presents today however, she has not obtained her imaging disks for review. She presents today complaining of ongoing diffuse left upper extremity. She reports no changes since her last visit.

PHYSICAL EXAMINATION:

The patient was an alert female in no acute distress. She was alert and cooperative throughout the examination.

Active elbow range of motion:	<u>Right</u>	<u>Left</u>
extension	0	0
flexion	140	140
pronation	90	90
supination	90	90

No deformity. No cyst seen. Mild tenderness to palpation.

Active wrist range of motion:	<u>Right</u>	<u>Left</u>
dorsiflexion	80	80
palmar flexion	80	80
radial deviation	20	20
ulnar deviation	40	40

Carpal tunnel tests:	<u>Right</u>	<u>Left</u>
Phalen	-	-
Tinel	-	-
thenar wasting	-	-

Ulnar nerve tests:	<u>Right</u>	<u>Left</u>
Froment	-	-
Wartenberg	-	-
FDP - small finger	-	-
1st dorsal interosseous wasting	-	-

de Quervain's tests:	<u>Right</u>	<u>Left</u>
Finkelstein's	-	-
first dorsal compartment TTP	-	-

Active shoulder range of motion:	<u>Right</u>	<u>Left</u>
abduction	180	180
forward elevation	180	180
external rotation (arm at side)	70	70
external rotation (90° abduction)	90	90
internal rotation (90° abduction)	80	80
internal rotation (spinous process)	T7	T7

PRIMARY TREATING PHYSICIAN'S SUPPLEMENTAL REPORT

RE: Almanza, Maria
EMP: Volt Workforce Solution
D/I: October 14, 2021
D/E: June 1, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Maria Almanza comes in today for reexamination. Today's evaluation was conducted through a Spanish-speaking interpreter.

The patient brings in her MRI disc of her left wrist.

REVIEW OF DIAGNOSTIC STUDIES:

11/23/22 George Elias, M.D. MRI of left wrist. There is a ganglion cyst noted along the volar aspect of the wrist, mild trapezial metacarpal osteoarthritic changes. There is no acute fracture.

PHYSICAL EXAMINATION:

The patient has decreased sensation in the median nerve distribution of the left hand. Positive Phalen's test.

DISCUSSION:

At this time, I would recommend EMG/nerve conduction studies to rule out carpal tunnel syndrome.

WORK STATUS:

No forceful gripping and grasping.

FOLLOW-UP:

Four weeks.

Today's evaluation was conducted through a Spanish-speaking interpreter.

DISCLOSURE:

I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury.

I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others. As to that information, I declare under penalty of perjury that the information accurately describes the information provided to me, and except as noted herein, that I believe it to be true.

This report was signed in the County of San Diego, California.

PRIMARY TREATING PHYSICIAN'S FOLLOW UP REPORT

RE: Maria Almanza
EMP: VOLT WORKFORCE SOLUTION
D/I: LT WRST, LT ARM, LT SHLDR 10142021
D/E: June 29, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Today's visit is conducted via a Spanish speaking translator.

Ms. Almanza presents today for reevaluation of her left upper extremity. Patient is experiencing ongoing left upper extremity pain. She was last seen on 6/1/23. At that time, she was sent for an EMG/NCV. Our request for this is still pending.

PHYSICAL EXAMINATION:

The patient was an alert female in no acute distress. She was alert and cooperative throughout the examination.

DIAGNOSIS:

1. Industrial left wrist sprain.
2. Industrial left shoulder sprain.

DISCUSSION:

The patient comes in for reevaluation of her left upper extremity. Patient is experiencing ongoing left upper extremity pain.

Await EMG/NCV.

She will remain on modified work duty. The patient was in agreement with this plan and all of her question were answered. The patient will follow up - 4 weeks

WORK RESTRICTIONS:

No forceful gripping or gasping

Please note that 30-39 minutes of total time were spent on this E/M service on this encounter date. This non-face-to-face as well as face-to-face total time included some or all of the following: preparing to see the patient; obtaining and/or reviewing separately obtained history; performing a medically necessary and appropriate examination and/or evaluation; counseling and educating the patient, family, and/or caregiver; ordering medications, tests, or procedures; scheduling surgery; referring to and communicating with other healthcare professionals; independently interpreting results and communicating results to the patient, family, and/or caregiver; care coordination; discussing the case with the nurse case manager; documenting clinical information in the EHR.

DISCLOSURE:

I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury.

I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others. REQUESTED SUPPLEMENTAL REPORT

RE: Almanza, Maria
EMP: Volt Workforce Solution
D/I: October 14, 2021
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

I am in receipt of your request for supplemental report and to review additional records.

REVIEW OF RECORDS:

05/04/23 Gerardo Del Campo. Request for supplemental report.

11/23/22 George Elias, M.D. MRI of the left wrist, ganglion cyst noted at the volar aspect of the wrist, mild trapeziometacarpal osteoarthritic changes.

01/03/23 Alan Strizak, M.D. Supplemental report. Supplemental Medical Legal Evaluation. Answers to specific questions would not be considered to achieve maximum

MARIA ALMANZA
Patient ID: 9350550 SRS ID: 663319 Date of Service: 07/17/2023

Page 1 of 3

0054

medical improvement until she is offered an opportunity for elective surgical treatment for the ganglion cyst along the volar aspect of the radial wrist.

1. She has not reached maximum medical improvement.
2. No changes to the conclusions.
3. Additional newly provided review continues to support conclusions on page 16.

DISCUSSION AND OPINION:

This applicant does not require surgical removal of the ganglion cyst. The ganglion cyst is tiny, and it is not medically indicated to remove this.

Recently, she was sent for nerve conduction studies to rule out a compressive neuropathy at the wrist.

Hopefully, this clarifies any questions. If you have any other questions, please do not hesitate to contact me.

One hour of time was spent reviewing the available records as well as the additional records that were sent to me and in preparation of this requested supplemental report.

DISCLOSURE:

I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury.

I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others. As to that information, I declare under penalty of perjury that the information accurately describes the information provided to me, and except as noted herein, that I believe it to be true.

This report was signed in the County of San Diego, California.

Very truly yours,

D/E: July 27, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

Today's visit was conducted via a Spanish speaking translator*

The patient presents today for a revaluation of her left wrist, left arm and left shoulder. She was last seen on 6/29/23 where we are awaiting her EMG/NCV. At this time the patient has a EMG/NCV test on 08/07/23. She has no significant complaints.

PHYSICAL EXAMINATION:

The patient was an alert female in no acute distress. She was alert and cooperative throughout the examination.

DIAGNOSIS:

1. Industrial left wrist sprain.
2. Industrial left shoulder sprain.

DISCUSSION:

The patient comes in for reevaluation of left upper extremity. The patient will obtain an EMG/NVC test.

The patient will follow up - 4 weeks or after the EMG/NVC test.

WORK RESTRICTIONS:

No forceful gripping

Please note that 30-39 minutes of total time were spent on this E/M service on this encounter date. This non-face-to-face as well as face-to-face total time included some or all of the following: preparing to see the patient; obtaining and/or reviewing separately obtained history; performing a medically necessary and appropriate examination and/or evaluation; counseling and educating the patient, family, and/or caregiver; ordering medications, tests, or procedures; scheduling surgery; referring to and communicating with other healthcare professionals; independently interpreting results and communicating results to the patient, family, and/or caregiver; care coordination; discussing the case with the nurse case manager; documenting clinical information in the EHR.

PERMANENT AND STATIONARY REPORT

RE: Maria Almanza
EMP: VOLT WORKFORCE SOLUTION
D/I: LT WRST, LT ARM, LT SHLDR 10142021
D/E: August 25, 2023
CLAIM: 002086-019487 WC-01
INS: Gallagher Bassett

To Whom It May Concern:

The above-named applicant, Maria Almanza, returns to the office today for a final disability evaluation. The applicant's condition has reached maximum medical improvement, and her status is now permanent and stationary. The following is a narrative report based upon today's final disability evaluation and impairment rating. For the purpose of today's final disability evaluation, a range of motion examination was performed and was medically necessary to complete this evaluation. In addition, one and a half hours of time was spent reviewing the available records and researching the AMA Guides to complete this final disability report.

INTERVAL HISTORY:

The patient was last seen by me on 7/27/23 where she was advised to obtain an EMG/ NCV test.

PRESENT COMPLAINTS AS STATED BY THE CLAIMANT:

Ongoing left shoulder, left arm, and left wrist pain.

REVIEW OF RECORDS:

One and a half hours of time was spent reviewing the available records.

8/7/23 Jeffrey T. Ho, D.D EMG/NCV test. Impression: normal

7/27/23 Christopher T. Behr, M.D. Follow up scheduled EMG/ NCV test on 8/7/23.

7/17/23 Christopher T. Behr, M.D. Requested Supplemental Report.

6/29/23 Christopher T. Behr, M.D. Follow up. Work status: Modified, No forceful gripping or gasping.

6/1/23 Christopher T. Behr, M.D. Follow up recommend EMG/nerve conduction studies to rule out carpal tunnel syndrome.

11/23/22 George Elias, M.D. MRI of left wrist. There is a ganglion cyst noted along the volar aspect of the wrist, mild trapezial metacarpal osteoarthritic changes. There is no acute fracture.

5/4/23 Christopher T. Behr, M.D. Follow up Obtain MRI scan and bring it in to be reviewed.

4/6/23 Christopher T. Behr, M.D Initial Visit. HX: on October 14, 2021, she was working in her usual and customary fashion while lifting and carrying a heavy box when she felt an acute onset of pain in the left-hand TX: Applicant needs to retrieve MRI images of the left wrist. DX: 1. Industrial left wrist sprain. 2. Industrial left shoulder sprain.

PHYSICAL EXAMINATION:

Tender on wrist. Normal sensation. Normal motor strength.

Active wrist range of motion:	<u>Right</u>	<u>Left</u>
dorsiflexion	70	50
palmar flexion	70	40
radial deviation	20	10
ulnar deviation	40	20
Carpal tunnel tests:	<u>Right</u>	<u>Left</u>
Phalen	-	-
Tinel	-	-
thenar wasting	-	-

Ulnar nerve tests:	<u>Right</u>	<u>Left</u>
Froment	-	-
Wartenberg	-	-
FDP - small finger	-	-
1st dorsal interosseous wasting	-	-

de Quervain's tests:	<u>Right</u>	<u>Left</u>
Finkelstein's	-	-
first dorsal compartment TTP	-	-

Active shoulder range of motion:	<u>Right</u>	<u>Left</u>
abduction	180	180
forward elevation	180	180
external rotation (arm at side)	70	70
external rotation (90° abduction)	80	90
internal rotation (90° abduction)	80	80
internal rotation (spinous process)	T7	T7
extension	50	50
adduction	50	50

Provocative tests:	<u>Right</u>	<u>Left</u>
Neer impingement	-	-
Hawkins impingement	-	-
Drop-arm	-	-
Gerber lift-off (subscapularis test)	-	-
Speed's test (bicipital tendinitis)	-	-
Yergason's test (bicipital tendinitis)	-	-
cross-body adduction (AC joint test)	-	-
O'Brien's maneuver (labral tear)	-	-

External rotation strength at side: 5/5 and symmetric.

Supraspinatus strength testing: 5/5 and symmetric.

RADIOGRAPHIC EVALUATION:

Plain radiographs, 3 views of the left shoulder reveal normal.

Plain radiographs, 3 views of the left wrist reveal normal.

DIAGNOSIS:

Industrial left wrist sprain and Industrial left shoulder sprain as a result of the industrial injury of October 14, 2021; permanent and stationary.

DISCUSSION:

This patient has reached maximum medical improvement. She has recovered a good range of motion and strength with the left shoulder, left arm, and left wrist following conservative treatment. At this time, her condition is permanent and stationary. Should the patient experience a flare up of her symptoms, she has been advised to contact our office for a follow-up evaluation. She has been reassured that her future medical care is covered as it relates to the industrial injury of her left shoulder, left arm, and left wrist.

This patient was initially sent to me for care on April 6, 2023. Her main complaint at that time was her left wrist, which is what we focused on. I couldn't find any abnormalities with regard to the left shoulder, she had full range of motion, and no provocative findings. She was concerned about a cyst in her left wrist. Initially we had difficulties obtaining images. The patient didn't bring in MRI disc and we had trouble getting it from imaging facility and insurance. When we finally got it, it was my opinion the cyst was small and surgical removal was not necessary. The applicant was complaining of numbness and pain in wrist and hand. EMG nerve conduction studies were ordered, however, it took time to get this approved through insurance, when we finally got it approved and completed the EMG/NCV was normal. Given the care she received her condition received MMI she does have some slight loss of range of motion of the wrist and she does have chronic pain therefore a 1% Whole person impairment rating add on for chronic pain was given in this circumstance. If you have any questions, please feel free to contact me.

DISABILITY STATUS:

The patient is permanent and stationary.

WORK RESTRICTIONS:

none

FACTORS FOR DISABILITY:

SUBJECTIVE FACTORS FOR DISABILITY:

In my medical opinion Maria Almanza experiences occasional minimal subjective complaints of pain which are those which constitute an annoyance, but do not preclude the patient from performing any activities which precipitate the pain.

OBJECTIVE FACTORS FOR DISABILITY:

MRI wrist: cyst

FACTORS FOR DISABILITY ACCORDING TO THE AMA GUIDES:

According to the Guides to the Evaluation of Permanent Impairment, Fifth Edition set forth by the American Medical Association, the patient's permanent impairment rating is as follows:

Referencing figure 16-40 on page 476, figure 16-43 on page 477, figure 16-46 on page 479, figure 16-28 on page 467, figure 16-31 on page 469, table 18-3 on page 575, and table 16-3 on page 439 of the upper extremity Chapter, the patient has a 0% left shoulder, 5% left wrist, upper extremity impairment which converts to a 5% whole person impairment for decreased range of motion in wrist. 1% add on for chronic pain converts to a 6% whole person impairment.

CAUSATION:

It is my medical opinion, based within reasonable medical probability, that Maria Almanza symptoms are causally related to the industrial injury of October 14, 2021.

APPORTIONMENT:

100% of the patient's disability was caused by her industrial injury.

VOCATIONAL REHABILITATION:

Not indicated.

FUTURE MEDICAL CARE:

The patient may require future medications, injections, physical therapy, or surgery- do not anticipate surgery is needed.

Please note that 40-54 minutes of total time were spent on this E/M service on this encounter date. This non-face-to-face as well as face-to-face total time included some or all of the following: preparing to see the patient; obtaining and/or reviewing separately obtained history; performing a medically necessary and appropriate examination and/or evaluation; counseling and educating the patient, family, and/or caregiver; ordering medications, tests, or procedures; scheduling surgery; referring to and communicating with other healthcare professionals; independently interpreting results and communicating results to the patient, family, and/or caregiver; care coordination; discussing the case with the nurse case manager; documenting clinical information in the EHR.

Maria Almanza
Patient ID: 9350550 SRS ID: 663319 Date of Service: 8/25/2023
